## **Continued Prosecution Application**

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-23 and 25-38 are rejected under 35 U.S.C. 102(b) as being anticipated by Yokoyama '908.

The patent to Yokoyama discloses an electronic diary 10(PDA) that has addresses. As shown in figure 10 the device finds an address in step 108 and gets the present position in step 103 from the present position detecting unit 53 which is a GPS unit. As shown in Figure 8 steps 26-30 the navigational apparatus combines the address from the PDA with the GPS coordinates to access an electronic map and display route data(see Column 5, lines 30-50 and column 7, lines 25-55. The display screen 12 has a touch pen 18 that can be placed on a cursor. Column 8, lines 25-40, disclose voice guidance and a cursor indicating position and direction of travel. Column 8, lines 60-65 discloses creating waypoints from the address and GPS information.
